

Industry Opportunity for Participation in AMCOM's Army Working Capital Fund (AWCF) Investment Projects Process Overview

22 Mar 2016

Lorenzo Thomas
AMCOM Logistics Center
U.S. Army Aviation and Missile Command

Industry Opportunities

- At 4-5 March 2015 Advance Planning for Industry (APBI), AMCOM Commanding General briefed three (3) opportunities for Industry to participate in AWCF Investment Projects for AMCOM supported Class IX repair components. See latest briefing located on this website.
 - Component-X exploratory research projects (as specifically requested) Root Cause failure investigations (as specifically requested) AWCF Projects to provide a fully qualified solution for a known sustainment issue

Mechanism & Process

Description	Who Initiates
<ul style="list-style-type: none"> • Integrated Priority List (IPL) - AMCOM will post an updated IPL semi-annually (as of 1 April and 1 October) on the CASL website. • The AMCOM Integrated Priority List (IPL) provides a comprehensive list of metrics for all active AMCOM-managed components to facilitate analysis of historical component performance in the areas of maintenance, supply, demand, operational performance and other related areas. 	AMCOM
<ul style="list-style-type: none"> • Component-X - AMCOM may solicit for an exploratory analysis for a specific component via a Request for Information (RFI) or and Request for Quote (RFQ). • Component X (Comp-X) performs exhaustive exploratory analysis on a component to identify where additional effort could lead to large payoff reductions in the sustainment cost burden by extending usable life, reducing demands, reducing Maintenance Man-Hours (MMH), and/or improving readiness. These components are collectively referred to as Values of Opportunity (VoO) and identified via a problem statement. 	AMCOM
<ul style="list-style-type: none"> • Root Cause - AMCOM may solicit specific Root Cause activities for a specific component via an Request for Information (RFI) or and Request for Quote (RFQ) • For a specific component, a Root Cause investigation determines associated root cause and recommends possible courses of action (COAs) to address problem statements identified by the Component X (Comp X) process. 	AMCOM
<ul style="list-style-type: none"> • AWCF Projects - Industry can submit candidate projects using the Project Template found on the CASL website based upon the information found within: <ul style="list-style-type: none"> - Integrated Priority List (IPL) - Other CASL website information such as High Priority List; Spare/Repair Part Projects, etc. • AWCF project candidates provide implementable solutions to mitigate known obsolescence issues, reduce sustainment costs, improve component reliability & usable life, and/or improve readiness. AMCOM will prioritize projects based on technical merit and stakeholder priorities. 	Industry

Feedback

Description	Who Initiates
<u>Request for PMO Coordination:</u> Opportunity for Industry to coordinate their technical innovations with the Government.	Industry
<ul style="list-style-type: none"> The Government will acknowledge the request via an automated email response to an Industry initiated request from the website. 	AMCOM
<ul style="list-style-type: none"> The Government will establish a specific date/time via either telephonic or email correspondence. 	AMCOM
<u>Candidate AWCF Project Submittal:</u> Opportunity for Industry to submit candidate projects	Industry
<ul style="list-style-type: none"> The Government will acknowledge the submittal via an automated email response 	AMCOM
<ul style="list-style-type: none"> After the cut-off date, if the Government can not properly evaluate the candidate project, the Government will notify the submitter of the deficiency for a future resubmittal. 	AMCOM
<ul style="list-style-type: none"> After the Government has determined whether a candidate project will be approved or not, the Government will notify industry. 	AMCOM
<u>Question:</u> Opportunity for Industry to request additional information.	Industry
<ul style="list-style-type: none"> The Government will acknowledge the submittal via an automated email response 	AMCOM
<ul style="list-style-type: none"> Depending upon the nature of the response, the Government will respond via either telephonic or email correspondence. For those responses with a general nature or of a broad interest, the Government will post the response on the CASL website. 	AMCOM
